

Data Leakage

Enabling the Data Guardians

SAVP enables organisations to effectively manage their Data Leakage Risks by maintaining a **repository of sensitive data**, **risk vectors**, **automating recertification** by **data custodians** and **managing incidents**.

Identify & categorise sensitive data

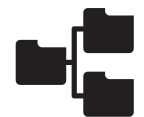

Recertify sensitive data

Workflow, user access, notifications & reports

Manage leakage incidents

Data Leakage Prevention System

Database Activity Monitoring Systems

Incidents

Security & Privacy Office

Data Custodians

Security Administrators

Incident Analytics
